

C.W. Cline Elementary

Morning Traffic Flow Pattern

On April 2, 2007 traffic patterns will be adjusted to alleviate morning traffic congestion while still providing safe conditions for the students. School Administration met with Mark Griffon, Fisd's Executive Director of Administrative Operations along with the Friendswood Police Department to have a traffic pattern review of Cline Elementary. Several options were discussed. The best plan with child safety as the highest priority is as follows: **The new plan will involve a Friendswood Police Officer to direct traffic straight in front of the school. After the last bus has departed (around 7:30), the officer will open up two drop-off points. There will be one drop-off point at Cline's main entrance and one at the west end or the "bus drop-off" entrance.**

Please examine the below changes and map. Should you have any questions, please call the school at 281.482.1201

Main Entrance Drop-Off

Traffic using the Main Entrance will continue to exit using the current right turn only pattern.

Bus Entrance Drop-Off

Traffic using the Bus Entrance will exit by a left turn only towards Sunset then a right turn on Sunset.
